SUBJECT INDEX TO VOLUME 29 (1988)

Nervous system (incl. skull)

Computed tomography of the brain in cases with venous vasculitis compared with an age-matched reference group 65
Emergency magnetic resonance examination of patients with spinal cord symptoms 69
In vivo magnetic resonance imaging and ^{31}P spectroscopy of large human brain tumours at 1.5 tesla . 77
Hyperostosis cranii—Radiography and scintigraphy compared 223
Magnetic resonance imaging and the acquired immunodeficiency syndrome dementia complex 227
Comparison of different pulse sequences for in vivo determination of T1 relaxation times in the human brain 231
Local blood-brain barrier penetration following systemic contrast medium administration—A case report and an experimental study 237
Computed tomography in low back pain before and after myelography—A qualitative comparison . . 353
Patient exposure when using $^{99}Tc^{m}$-DTPA for evaluation of cerebrospinal shunt patency 378
Diagnostic imaging in glioma—Delineation and classification using positron emission tomography (abstract) 381
Correlative investigations of craniospinal anatomy and pathology with computed tomography, magnetic resonance imaging and cryomicrotomy (abstract) 381
Computed tomography in patients with dementia probably due to toxic encephalopathy 495
Cysticercosis of the brain—The value of computed tomography 625
Chemical shift selective magnetic resonance imaging of the optic nerve in patients with acute neuritis . 629
Cerebral panangiography in spontaneous subarachnoid hemorrhage from intracranial aneurysms. . . 633
Lumbar myelography with iohexol—Adverse effects compared with spinal puncture. 637

Ear, nose, throat and eye

Effect of training and experience on radiologic diagnostic performance in midfacial trauma 83
Effect of alcohol intake on the radiographic quality in patients with midfacial trauma 217
Computed tomography and magnetic resonance imaging of the base of the tongue and the floor of the mouth (abstract) 253
Image quality in radiography of midfacial trauma . . 395
Computed tomography of the oropharynx in obstructive sleep apnea 401
Cineradiography in closed and open pharyngeal swallow 407
Survey of dental radiographic equipment and radiation doses in Finland 481
Orbital phlebography for differentiation between multiple sclerosis and venous vasculitis in subacute blindness 505
Chemical shift selective magnetic resonance imaging of the optic nerve in patients with acute optic neuritis 629

Bones, joints and soft tissue

Vertebral bone mineral measurement using dual photon absorptiometry and computed tomography . . 89
Carpal trauma—A diagnostic problem 95
The scaphoid fat stripe in the diagnosis of carpal trauma 97
Skeletal scintigraphy of the wrist in suggested scaphoid trauma 101
Intraosseous arteriovenous malformations mimicking malignant disease 109
Computed tomography after lumbar disc surgery . . 179
Juxta-articular erosions in reflex sympathetic dystrophy 183
Trochanteric fractures—Classification and mechanical stability in McLaughlin, Ender and Richard osteosynthesis 189
Bone scintigraphy in staging of bladder carcinoma . 251
Digital radiography of the spine, large bones and joints using stimulable phosphor—Early clinical experience 267
Roentgenologic assessment of spondylolisthesis—I—A study of measurement variations 345
Comparison of two- and three-dimensional methods for assessment of orientation of the total hip prosthesis 357
The percentage of migration as indicator of femoral head position 363
Prediction of the stability of minimally displaced fractures of the lateral humeral condyle 367
Position, orientation and component interaction in dislocation of the total hip prosthesis 441

Pain as an indicator of bone metastasis 445
Radiography and scintigraphy in the assessment of early gonarthrosis 451
Ultrasonography of the hand in rheumatoid arthritis 457
Triple-photon energy absorptiometry in the measurement of bone mineral 461
Bone mass determination from microradiographs by computer-assisted videodensitometry—I—Methodology 465
Femoral anteversion and restricted range of motion in total hip prostheses 551
The vertical position of the patella—A new radiographic method for routine use 555
Lesion of the anterior cruciate ligament and sagittal disalignment of the knee in weight-bearing 559
Chronic recurrent multifocal osteomyelitis in children—A roentgenologic and scintigraphic investigation 565
Correlation of macroscopic osteoarthrotic changes and radiographic findings in the acromioclavicular joint 571
Sterno-costo-clavicular hyperostosis—A case report with a review of the literature 577
Radiography of pressure ulcers 581
Bone mass determination from microradiographs by computer-assisted videodensitometry—II—Aluminium as a reference substance 611
The condyle view—A scintigraphic projection of the knee 619
Thoracolumbar junctional region of the spine—An anatomical, pathological and radiological study (abstract) 621
Radiology of total hip prosthesis—Prosthetic position, orientation, design, component interaction and dislocation (abstract) 623
Aspects of femoral neck anteversion—Theoretical considerations and experimental results 689
Femoral anteversion measured by ultrasonography and radiography—An anatomic investigation . . . 695
Range of motion caused by design of the total hip prosthesis 701
Bilateral femoral head dysplasia and osteochondritis—Multiple epiphyseal dysplasia tarda, spondylo-epiphyseal dysplasia tarda, and bilateral Legg-Perthes disease 705
Diagnostic value of stress radiography in lesions of the lateral ligaments of the ankle 711
A scintigraphic study of Colles' fracture—Comparison between cementation and closed treatment . . 715
Quantitative computed tomography in measurement of vertebral trabecular bone mass—A modified method 719
Influence of acetabular component position in non-cemented total hip arthroplasty—A radiologic and clinical study 746

Cardiovascular system

Pulmonary artery sling—Diagnosis by magnetic resonance imaging 7
Intraosseous arteriovenous malformation mimicking malignant disease 109
Non-invasive measurement of stroke volume and left ventricular ejection fraction—Radionuclide cardiography compared with left ventricular cardioangiography 175
Increased arterial wall stiffness and thickness in medium-sized arteries in patients with insulin-dependent diabetes mellitus 299
Repeat femoral arteriography in hyperlipidemic patients—A study of progression and regression of atherosclerosis 303
Quantitation of atherosclerosis in femoral arteriography with ECG gated exposures 311
Transluminal angioplasty of a stenotic surgical splenorenal shunt 327
Contrast media induced ventricular fibrillation during coronary angiography in dogs 371
Chest radiography in acute traumatic rupture of the thoracic aorta 411
Cardiac output determination during intravenous cardioangiography using x-ray flourescence analysis . 419
Internal diameter of the common femoral artery in patients with insulin-dependent diabetes mellitus . 423
Effect of iohexol and diatrizoate on pulmonary arterial pressure following pulmonary angiography—A clinical comparison in man 487
Transluminal catheter angioplasty of abdominal aorta in Takayasu's arteritis 509
Determination of glomerular filtration rate and cardiac output in connection with routine radiologic examinations—X-ray fluorescence analysis of iodinated contrast media (abstract) 622
Cerebral panangiography in spontaneous subarachnoid hemorrhage from intracranial aneurysms . . 633
Intra-operative digital angiography as a control of the in situ saphenous vein by-pass grafts 645
Contact thermography as a screening test for deep venous thrombosis following major hip surgery . . 649
ECG gating at angiography for calculation of arterial lumen volume 749

Mediastinum and respiratory system

Blast injuries 1
Wegener's granulomatosis in North India—Radiologic manifestations in eleven patients 11
Computed tomography in the diagnosis and treatment of mediastinal abnormalities in children . . . 115
Computed tomography in opportunistic lung infections 171
Computed tomography in primary non-seminomatous germ cell tumors of the mediastinum 289

Large-image intensifier photofluorography and conventional radiography in pulmonary emphysema . 293
Atelectasis and gas exchange during general anesthesia (abstract) 381
Chest radiography in acute traumatic rupture of the thoracic aorta 411
Computed tomography and conventional radiography in intrathoracic metastases from non-seminomatous testicular tumor 547
Computed tomography of the lungs in acquired immunodeficiency syndrome—An early indicator of interstitial pneumonia 641

Digestive tract

Radiologic diagnosis of gastro-oesophageal reflux by means of graded abdominal compression 45
Effect of glucagon-(1–21)-peptide on gastroduodenal motility during upper gastrointestinal examination—Randomized trials 49
Water-soluble contrast media in radiography of small bowel obstrucion—Comparison of ionic and non-ionic contrast media 53
Catheter perforation of distal oesophagus with duodenal re-entry of catheter 211
Radiographic findings in overlooked colon carcinomas—A retrospective analysis 331
Transanorectal ultrasonography in anal carcinoma—A prospective study of 21 patients 337
Wheat fibre before radiography of the large bowel . 375
Superparamagnetic particles as an MRI contrast agent for the gastrointestinal tract 599
Water-soluble contrast media compared with barium in enteric follow-through—Local effects and radiographic efficacy in rats with simple obstruction of the small bowel 603
Anatomy and permeability of tumour vessels—An experimental study in nude rats with the aim of increasing the uptake of monoclonal anti-CEA antibodies in human colonic cancer (abstract) 623
Accuracy of radiographic and endoscopic diagnosis of duodenal ulcer 661
Enteroclysis—Improved performance using a flow inducer 665
Blood lead levels in patients with lead shot retained in the appendix 745

Liver, biliary tract

Control of hepatic tumor hemorrhage by transcatheter embolization with Ethibloc 15
Effect of interferon on T1 relaxation times of liver metastases from endocrine gastrointestinal tumours 21
Three-dimensional demonstration of liver and spleen by a computer graphics technique 27
Distribution of water, fat, and metals in normal liver and in liver metastases influencing attenuation on computed tomography 33
Ultrasonography in acute gallbladder perforation . . 41
False negative sonographic finding in emphysematous cholecystitis 137
Intra-arterial cis-platinum infusion with sodium thiosulfate protection and angiotensin II induced hypertension for treatment of hepatocellular carcinoma 197
Ultrasonography and gallbladder perforation in acute cholecystitis 203
Fatty meal provocation monitored by ultrasonography—A method to diagnose ambiguous gallbladder disease 207
Significant reduction of the echogenicity of the compressed cavernous hemangioma 317
Quantitative single photon emission computed tomography applied to a comparison of propane-tetraphosphonate and albumin colloid for liver and spleen scintigraphy 321
Inferior phrenic artery embolization in the treatment of hepatic neoplasms 427
Resectability of liver tumours evaluated by computed tomography 531
Hypoechoic lesions without halo in echogenic liver—A frequent sonographic dilemma 541
Diagnosis and therapy monitoring of liver metastases from neuroendocrine tumours (abstract) 622
Radiographic diagnosis of bile duct cysts—Retrospective analysis of thirteen cases 657

Spleen, pancreas

Three-dimensional demonstration of liver and spleen by a computer graphics technique 27
Scintigraphic evaluation of traumatic splenic lesions in children 121
Monitoring of pancreatic graft perfusion by first passage radionuclide angiography 138
Ionic and non-ionic contrast media used for contrast-enhanced computed tomography in experimental pancreatitis 243
Ultrasonography and computed tomography in pancreatic malignancy 343
Reliability of ultrasound-guided fine-needle biopsy of pancreatic masses 535

Abdomen

Direct diverticular inguinal hernia 57
Asymptomatic abdominal hydatidosis detected by ultrasonography 431
Radiologic diagnosis in traumatic rupture of the right diaphragm—Report of a case 653

Urogenital system

Magnetic resonance imaging of renal masses at 0.02 tesla 61

Renal parenchymal volume in children—Normal values assessed by ultrasonography 127
Current trends in the management of urinary stones 145
Ultrasonography of the kidney following renal biopsy in children 151
Urographic renal size in acute pyelonephritis in childhood 155
Ultrasonography in undescended testes 159
Suprapubic micturition cystourethrography 165
Bone scintigraphy in staging of bladder carcinoma . 251
Digital urography using stimulable phosphor—An experimental study in the rabbit 273
Digital radiography using laser stimulated luminescence for evaluation of urinary calcifications . . . 277
A 'split-away technique' for percutaneous nephrostomy 376
Validity of renal split function by single probe renography in hypertensive patients—A comparison with gamma camera scintigraphy 377
Computed tomography of invasive bladder carcinoma after diagnostic transurethral resection 435
Effects of intravenous injection of diatrizoate, iohexol or ioxilan on renal size, urine profiles and blood profiles in the rabbit 491
Angiomyolipoma of the kidney—Comparison between magnetic resonance imaging, computed tomography, and ultrasonography for diagnosis . . . 523
Renal medullary cystic disease—Findings at urography and ultrasonography 527
Renal size and function in childhood urinary tract infections (abstract) 621
Determination of glomerular filtration rate and cardiac output in connection with routine radiologic examinations—X-ray fluorescence analysis of iodinated contrast media (abstract) 622
Glomerular filtration rate estimated after multiple injections of contrast medium during angiography . 669
Ultrasound in renal pyogenic infection—Imaging and intervention 675
Unilateral hydronephrosis with congenital absence of contralateral kidney in children—Report of six cases and review of literature 679
Reliability of voiding colpo-cysto-urethrography in female urinary stress incontinence before and after treatment 685
Alteration of renal blood flow during sequential embolization of the canine kidney 727
Effects on urine profiles of diatrizoate on hydrated and dehydrated rats—A double cross-over study . 731

Retroperitoneum

Normal and anomalous structures simulating retroperitoneal lymphadenopathy at computed tomography 385

Endocrine system

Ultrasonically guided fine needle aspiration of suggested enlarged parathyroid glands 213
Nine pheochromocytomas in the same patient—Final mapping with ultrasound and angiography 515
Computed tomography in primary and secondary adrenal tumours 519

Lymphatic system

Magnetic resonance imaging in malignant lymphoma (abstract) 382
Normal and anomalous structures simulating retroperitoneal lymphadenopathy at computed tomography 385
Lymphography and computed tomography in lymph node metastases from malignant melanoma 391

Breast

Non-palpable breast lesions—Diagnostic criteria and pre-operative localization 285
Optical spectroscopy—Pre-mammography marker . 497
Transformation of the female breast during compression at mammography with special reference to the importance for localization of a lesion (abstract) . 621

Trauma

Blast injuries 1
Effect of alcohol intake on the radiographic quality in patients with midfacial trauma 217
Chest radiography in acute traumatic rupture of the thoracic aorta 411
Radiologic diagnosis in traumatic rupture of the right diaphragm—Report of a case 653

Computed tomography

Three-dimensional demonstration of liver and spleen by a computer graphics technique 27
Distribution of water, fat, and metals in normal liver and in liver metastases influencing attenuation on computed tomography 33
Computed tomography of the brain in cases with venous vasculitis compared with an age-matched reference group 65
Vertebral bone mineral measurement using dual photon absorptiometry and computed tomography . . 89
Computed tomography in the diagnosis and treatment of mediastinal abnormalities in children . . . 115
Computed tomography in opportunistic lung infections 171
Computed tomography after lumbar disc surgery . . 179
Ionic and non-ionic contrast media used for contrast-

enhanced computed tomography in experimental pancreatitis 243
Computed tomography and magnetic resonance imaging of the base of the tongue and the floor of the mouth (abstract) 253
Computed tomography in primary non-seminomatous germ cell tumors of the mediastinum 289
Ultrasonography and computed tomography in pancreatic malignancy 343
Computed tomography in low back pain before and after myelography—A qualitative comparison . . 353
Diagnostic imaging in glioma—Delineation and classification using positron emission tomography (abstract) 381
Atelectasis and gas exchange during general anesthesia (abstract) 381
Correlative investigations of craniospinal anatomy and pathology with computed tomography, magnetic resonance imaging and cryomicrotomy (abstract) 381
Normal and anomalous structures simulating retroperitoneal lymphadenopathy at computed tomography 385
Lymphography and computed tomography in lymph node metastases from malignant melanoma 391
Computed tomography of the oropharynx in obstructive sleep apnea 401
Computed tomography of invasive bladder carcinoma after diagnostic transurethral resection 435
Computed tomography in patients with dementia probably due to toxic encephalopathy 495
Computed tomography in primary and secondary adrenal tumours 519
Angiomyolipoma of the kidney—Comparison between magnetic resonance imaging, computed tomography, and ultrasonography for diagnosis . . . 523
Resectability of liver tumours evaluated by computed tomography 531
Computed tomography and conventional radiography in intrathoracic metastases from non-seminomatous testicular tumor 547
Diagnosis and therapy monitoring of liver metastases from neuroendocrine tumours (abstract) 622
Cysticercosis of the brain—The value of computed tomography 625
Computed tomography of the lungs in acquired immunodeficiency syndrome—An early indicator of interstitital pneumonia 641
Radiographic diagnosis of bile duct cysts—Retrospective analysis of thirteen cases 657
Quantitative computed tomography in measurement of vertebral trabecular bone mass—A modified method 719

Ultrasonography

Ultrasonography in acute gallbladder perforation . . 41
Renal parenchymal volume in children—Normal values assessed by ultrasonography 127
False negative sonographic finding in emphysematous cholecystitis 137
Ultrasonography of the kidney following renal biopsy in children 151
Ultrasonography in undescended testes 159
Ultrasonography and gallbladder perforation in acute cholecystitis 203
Fatty meal provocation monitored by ultrasonography—A method to diagnose ambiguous gallbladder disease 207
Ultrasonically guided fine needle aspiration of suggested enlarged parathyroid glands 213
Increased arterial wall stiffness and thickness in medium-sized arteries in patients with insulin-dependent diabetes mellitus 299
Significant reduction of the echogenicity of the compressed cavernous hemangioma 317
Transanorectal ultrasonography in anal carcinoma—A prospective study of 21 patients 337
Ultrasonography and computed tomography in pancreatic malignancy 343
Internal diameter of the common femoral artery in patients with insulin-dependent diabetes mellitus . 423
Asymptomatic abdominal hydatidosis detected by ultrasonography 431
Ultrasonography of the hand in rheumatiod arthritis 457
Nine pheochromocytomas in the same patient—Final mapping with ultrasound and angiography 515
Angiomyolipoma of the kidney—Comparison between magnetic resonance imaging, computed tomography, and ultrasonography for diagnosis . . . 523
Renal medullary cystic disease—Findings at urography and ultrasonography 527
Reliability of ultrasound-guided fine-needle biopsy of pancreatic masses 535
Hypoechoic lesions without halo in echogenic liver—A frequent sonographic dilemma 541
Renal size and function in childhood urinary tract infections (abstract) 621
Diagnosis and therapy of liver metastases from neuroendocrine tumours (abstract) 622
Radiologic diagnosis in traumatic rupture of the right diaphragm—Report of a case 653
Radiographic diagnosis of bile duct cysts—Retrospective analysis of thirteen cases 657
Ultrasound in renal pyogenic infection—Imaging and intervention 675
Femoral anteversion measured by ultrasonography and radiography—An anatomic investigation . . . 695
Multiple real time parallel section scans—A new sonographic principle 750

Nuclear radiology

Vertebral bone mineral measurement using dual photon absorptiometry and computed tomography . . 89

Scintigraphic evaluation of traumatic splenic lesions in children 121
Monitoring of pancreatic graft perfusion by first passage radionuclide angiography 138
Non-invasive measurement of stroke volume and left ventricular ejection fraction—Radionuclide cardiography compared with left ventricular cardioangiography 175
Hyperostosis cranii—Radiography and scintigraphy compared 223
Bone scintigraphy in staging of bladder carcinoma . 251
Quantitative single photon emission computed tomography applied to a comparison of propanetetraphosphonate and albumin colloid for liver and spleen scintigraphy 321
Validity of renal split function by single probe renography in hypertensive patients—A comparison with gamma camera scintigraphy 377
Patient exposure when using $^{99}Tc^{m}$-DTPA for evaluation of cerebrospinal fluid shunt patency 378
Diagnostic imaging in glioma—Delineation and classification using positron emission tomography (abstract) 381
Atelectasis and gas exchange during general anesthesia (abstract) 381
Radioactive colloids—Particle characterization, experimental studies, clinical applications and dosimetric considerations (abstract) 382
Quantitative SPECT—Studies of some factors influencing quantitation accuracy in single photon emission computed tomography (abstract) 383
Radiography and scintigraphy in the assessment of early gonarthrosis 451
Triple-photon energy absorptiometry in the measurement of bone mineral 461
The condyle view—A scintigraphic projection of the knee 619
Development and evaluation of scatter correction techniques in SPECT (abstract) 623
A scintimetric study of Colles' fracture—Comparison between cementation and closed treatment 715

Magnetic resonance imaging and spectroscopy

Pulmonary artery sling—Diagnosis by magnetic resonance imaging 7
Effect of interferon on T1 relaxation times of liver metastases from endocrine gastrointestinal tumours 21
Magnetic resonance imaging of renal masses at 0.02 tesla 61
Emergency magnetic resonance examination of patients with spinal cord symptoms 69
In vivo magnetic resonance imaging and ^{31}P spectroscopy of large human brain tumours at 1.5 tesla . 77
Magnetic resonance imaging with maximum contrast between two selected tissues composed of recordings with three repetition times 140
Proton relaxation in vivo, in vitro and cellularity . . 143
Magnetic resonance imaging and the acquired immunodeficiency syndrome dementia complex 227
Comparison of different pulse sequences for in vivo determination of T1 relaxation times in the human brain 231
Computed tomography and magnetic resonance imaging of the base of the tongue and the floor of the mouth (abstract) 253
Correlative investigations of craniospinal anatomy and pathology with computed tomography, magnetic resonance imaging and cryomicrotomy (abstract) 381
Magnetic resonance imaging in malignant lymphoma (abstract) 382
Aspects of image intensity and relaxation time assessment in magnetic resonance imaging—An experimental and clinical study (abstract) 383
Evaluation of biexponential relaxation processes by magnetic resonance imaging—A phantom study . 473
Angiomyolipoma of the kidney—Comparison between magnetic resonance imaging, computed tomography, and ultrasonography for diagnosis . . . 523
Lesion of the anterior cruciate ligament and sagittal disalignment of the knee in weight-bearing 559
Superparamagnetic particles as an MRI contrast agent for the gastrointestinal tract 599
Diagnosis and therapy monitoring of liver metastases from neuroendocrine tumours (abstract) 622
Chemical shift selective magnetic resonance imaging of the optic nerve in patients with acute optic neuritis 629

Digital radiography

On the work of the radiologist—Separation of image capture from image display 257
Digital radiography of the spine, large bones and joints using stimulable phosphor—Early clinical experience 267
Digital urography using stimulable phosphor—An experimental study in the rabbit 273
Digital radiography using laser stimulated luminescence for evaluation of urinary calcifications . . . 277
Bone mass determination from microradiographs by computer-assisted videodensitometry—I—Methodology 465
Bone mass determination from microradiographs by computer-assisted videodensitometry—I—Aluminium as a reference substance 611
Intra-operative digital angiography as a control of the in situ saphenous vein by-pass grafts 645

Pediatric radiology

Computed tomography in the diagnosis and treatment of mediastinal abnormalities in children . . . 115

Renal parenchymal volume in children—Normal values assessed by ultrasonography 127
Ultrasonography of the kidney following renal biopsy in children 151
Urographic renal size in acute pyelonephritis in childhood 155
The percentage of migration as indicator of femoral head position 363
Renal size and function in childhood urinary tract infections (abstract) 621
Unilateral hydronephrosis with congenital absence of contralateral kidney in children—Report of six cases 679
Bilateral femoral head dysplasia and osteochondritis—Multiple epiphyseal dysplasia tarda, spondylo-epiphyseal dysplasia tarda, and bilateral Legg-Perthes disease 705

Interventional radiology

Control of hepatic tumor hemorrhage by transcatheter embolization with Ethibloc 15
Current trends in the management of urinary stones 145
Intra-arterial cis-platinum infusion with sodium thiosulfate protection and angiotensin II induced hypertension for treatment of hepatocellular carcinoma 197
Ultrasonography guided fine needle aspiration of suggested enlarged parathyroid glands 213
Transluminal angioplasty of a stenotic surgical splenorenal shunt 327
Inferior phrenic artery embolization in the treatment of hepatic neoplasms 427
Transluminal catheter angioplasty of abdominal aorta in Takayasu's arteritis 509
Reliability of ultrasound-guided fine-needle biopsy of pancreatic masses 535
Alteration of renal blood flow during sequential embolization of the canine kidney 727

Experimental radiology

Intravenous injection of ioxilan, iohexol and diatrizoate—Effects on urine profiles in the rat 131
Local blood-brain barrier penetration following systemic contrast medium administration—A case report and an experimental study 237
Ionic and non-ionic contrast media used for contrast-enhanced computed tomography in experimental pancreatitis 243
Addition of local anesthetics to contrast media—II—Increase of acute mortality in mice with intravenous contrast administration 247
Digital urography using stimulable phosphor—An experimental study in the rabbit 273
Contrast media induced ventricular fibrillation during coronary angiography in dogs 371
Effects of intravenous injection of diatrizoate, iohexol or ioxilan on renal size, urine profiles and blood profiles in the rabbit 491
Effect of contrast media on whole blood filtrability—An in vitro comparative study of iohexol, iopamidol and ioxaglate on rat blood 593
Water-soluble contrast media compared with barium in enteric follow-through—Local effects and radiographic efficacy in rats with simple obstruction of the small bowel 603
Anatomy and permeability of tumour vessels—An experimental study in nude rats with the aim of increasing the uptake of monoclonal anti-CEA antibodies in human colonic cancer (abstract) 623
Alteration of renal blood flow during sequential embolization of the canine kidney 727
Effects on urine profiles of diatrizoate in hydrated and dehydrated rats—A double cross-over study . 731

Contrast media and other drugs

Water-soluble contrast media in radiography of small bowel obstruction—Comparison of ionic and non-ionic contrast media 53
Intravenous injection of ioxilan, iohexol and diatrizoate—Effects on urine profiles in the rat 131
Local blood-brain barrier penetration following systemic contrast medium administration—A case report and an experimental study 237
Ionic and non-ionic contrast media used for contrast-enhanced computed tomography in experimental pancreatitis 243
Addition of local anesthetics to contrast media—II—Increase of acute mortality in mice with intravenous contrast administration 247
Contrast media induced ventricular fibrillation during coronary angiography in dogs 371
Effect of iohexol and diatrizoate on pulmonary arterial pressure following pulmonary angiography—A clinical comparison in man 487
Effects of intravenous injection of diatrizoate, iohexol or ioxilan on renal size, urine profiles and blood profiles in the rabbit 491
Contrast medium induced changes in granulocyte adherence in vitro and during angiography 585
Influence of radiographic contrast media on phagocytosis 589
Effect of contrast media on whole blood filtrability—An in vitro comparative study of iohexol, iopamidol and ioxaglate on rat blood 593
Water-soluble contrast media compared with barium in enteric follow-through—Local effects and radiographic efficacy in rats with simple obstruction of the small bowel 603
Determination of glomerular filtration rate and cardiac output in connection with routine radiologic

examinations—X-ray fluorescence analysis of iodinated contrast media (abstract) 622
Lumbar myelography with iohexol—Adverse effects compared with spinal puncture 637
Glomerular filtration rate estimated after multiple injections of contrast medium during angiography . 669
Effects on urine profiles of diatrizoate in hydrated and dehydrated rats—A double cross-over study . 731
Development of polyclonal and monoclonal antibodies to iodinated contrast media 737
Effect of contrast media on beta-endorphin secretion—An in vitro study 741
Blood lead levels in patients with lead shot retained in the appendix 745

Physics and technique

Three-dimensional demonstration of liver and spleen by a computer graphics technique 27
Magnetic resonance imaging with maximum contrast between two selected tissues composed of recordings with three repetition times 140
On the work of the radiologist—Separation of image capture from image display 257
Large-image intensifier photofluorography and conventional radiography in pulmonary emphysema—Correlation with computed tomography 293
Significant reduction of the echogenicity of the compressed cavernous hemangioma 317
Comparison of two- and three-dimensional methods for assessment of orientation of the total hip prosthesis 357
A 'split-away technique' for percutaneous nephrostomy 376
Patient exposure when using $^{99}Tc^{m}$-DTPA for evaluation of cerebrospinal fluid shunt patency 378
Radioactive colloids—Particle characterization, experimental studies, clinical applications and dosimetric considerations (abstract) 382
Aspects of image intensity and relaxation time assessment in magnetic resonance imaging—An experimental and clinical study (abstract) 383
Quantitative SPECT—Studies of some factors influencing quantitation accuracy in single photon emission computed tomography (abstract) 383
Evaluation of biexponential relaxation processes by magnetic resonance imaging—A phantom study . 473
Optical spectroscopy—Pre-mammography marker . 497
The vertical position of the patella—A new radiographic method for routine use 555
The condyle view—A scintigraphic projection of the knee 619
Transformation of the female breast during compression at mammography with special reference to the importance for localization of a lesion (abstract) . 621
Determination of glomerular filtration rate and cardiac output in connection with routine radiologic examinations—X-ray fluorescence analysis of iodinated contrast media (abstract) 622
Development and evaluation of scatter correction techniques in SPECT (abstract) 623
Intra-operative digital angiography as a control of the in situ saphenous vein by-pass grafts 645
Enteroclysis—Improved performance using a flow inducer 665
Glomerular filtration rate estimated after multiple injections of contrast medium during angiography . 669
ECG gating at angiography for calculation of arterial lumen volume 749
Multiple real time parallel section scans—A new sonographic principle 750

Departmental management

Maintenance of x-ray equipment—Organization, content and performance (abstract) 253

Abstracts of theses

Computed tomography and magnetic resonance imaging of the base of the tongue and the floor of the mouth 253
Maintenance of x-ray equipment—Organization, content and performance 253
Diagnostic imaging in glioma—Delineation and classification using positron emission tomography . . 381
Atelectasis and gas exchange during general anesthesia 381
Correlative investigation of craniospinal anatomy and pathology with computed tomography, magnetic resonance imaging and cryomicrotomy . . . 381
Magnetic resonance imaging in malignant lymphoma 382
Radioactive colloids—Particle characterization, experimental studies, clinical applications and dosimetric considerations 382
Aspects of image intensity and relaxation time assessment in magnetic resonance imaging—An experimental and clinical study 383
Quantitative SPECT—Studies of some factors influencing quantitation accuracy in single photon emission computed tomography 383
Transformation of the female breast during compression at mammography with special reference to the importance for localization of a lesion 621
Thoracolumbar junctional region of the spine—An anatomical, pathological and radiological study . . 621
Renal size and function in childhood urinary tract infections 621
Diagnosis and therapy monitoring of liver metastases from neuroendocrine tumors 622
Determination of glomerular filtration rate and cardiac output in connection with routine radiologic

examinations—X-ray fluorescence analysis of iodinated contrast media 622
Radiology of total hip prosthesis—Prosthetic position, orientation, design, component interaction and dislocation 623
Development and evaluation of scatter correction techniques in SPECT 623
Anatomy and permeability of tumour vessels—An experimental study in nude rats with the aim of increasing the uptake of monoclonal anti-CEA antibodies in human colonic cancer 623

Book reviews

An atlas and text of the breast 144
Radiologic diagnosis of renal transplant complications 144
Interventional real-time ultrasound 144
Radiopharmacy and radiopharmacology yearbook . 144
Cranial computed tomography—A comprehensive text 254
MRI of the lumbar spine—A practical approach to image interpretation 254
Digital subtraction angiography—Practical aspects . 254
Computed tomography in the evaluation of trauma . 255
Lymphatic imaging—Lymphography, computed tomography and scintigraphy 255
Radiology of the kidney 255
Clinics in diagnostic ultrasound 256
Ultrasonic differential diagnosis of tumors 256
Textbook of nuclear medicine 256
Hand-held and automated breast ultrasound 384
The year book of nuclear medicine 384
Nuclear medicine in urology and nephrology 384
Clinical imaging of the colon and rectum 384
Radiology of facial injury 624
Breast imaging—Diagnosis and morphology of breast cancer 624
Radiology of the esophagus 624
Sonomammography—An atlas of comparative breast ultrasound 624
Magnetic resonance of the reproductive system . . . 752
Ultraschall des Abdomens 752
Using and understanding medical statistics 752
Imaging in hepatobiliary disease 752
